ABOUT ME

Passionate Frontend Developer with a knack for crafting user-centric interfaces and a creative mind that thrives in collaborative environments.

My programming journey began at Çiğli Science High School, where I embarked on a project with a friend, developing a sophisticated version of a laser meter using Arduino. This experience ignited my passion for software development, and I pursued a degree in Computer Engineering at Manisa Celal Bayar University.

Frontend development holds a special place in my heart. The ability to transform ideas into visually appealing and intuitive interfaces that enhance user experiences is truly inspiring. I strive to create products that not only meet user needs but also exceed expectations. My expertise lies in both React and React Native.

Beyond my technical proficiency, I possess a creative flair and a collaborative spirit. I am an active member of a YouTube channel called "Filmiyorum," where, along with a friend from high school, we provide insightful commentary on movies and series. We have garnered over 7.9k subscribers, and I take pride in my weekly contributions as a voice-over artist and video editor.

I am confident that my technical skills, creative approach, and collaborative spirit make me an asset to any team. I am eager to contribute my expertise and passion to challenging projects that make a positive impact.

WORK EXPERIENCE

Web developers

Martı Yazılım [01/08/2021 – Current]
